

Floors & Walls Contribute to the Health, Safety & Sanitation...

of your patients and healthcare workers. Hospitals work hard each day to keep the building and its equipment clean so its patients can heal quickly and workers can do their job in a safe environment. Healthcare engineers understand the evolving challenges of aging buildings that are constantly under attack.

Staying on top of proven technologies is essential.

There's one proven flooring and wall technology for hospitals. Concare and BASF.

Together, these seamless solutions are tailored to the specifications of each area, whether it be the operating room, cafeteria, MRI, bathrooms, ICU, boiler room, emergency room, hallways or even the heliport. From top to bottom, we protect every corner from the potential of bacterial growth.
